

TABLE OF CONTENTS

Keynote Address - Messy rivers are healthy rivers: The role of physical complexity in Sustaining Ecosystem Processes Ellen Wohl.	1
Keynote Address – Promoting and Facilitating Integrated Catchment Management, River Tweed, Scotland Derek Robeson.	2
Large scale ecohydraulic modelling on the Goulburn River Lachlan Inglis and Ben Tate.	3
Water Plan – Water For Victoria Elizabeth Johnston and Kate Berg.	9
When is artificially opening Intermittently Closed Estuaries (ICE) most effective? Sarah McSweeney, David Kennedy and Ian Rutherford.	10
Data democratisation: empowering the environmental management community through data Nick Marsh and Bonny Marsh.	22
Approaches to Modelling Large Floodplains and Wetlands Alison Miller and Ben Tate.	31
Biodiversity offsets: Why ‘no net loss’ is even more problematic for urban streams Myles Coker, Christopher Walsh, Nicholas Bond and Yung En Chee.	38
Land- sea sediment dynamics of the Mackay coastal zone: the role of landscape setting in the integration of waterway, estuary and coastline management Elisa Zavadil and Neville Rosengren.	43
Collaborative processes for prioritisation: a case study from western Victoria Chloe Wiesenfeld, Tori Perrin, Bryce Morden, Clare Wilson, Greg Fletcher and Stephen Ryan.	53
Ecological response to an experimental high flow release in the upper Yarra River, Victoria, Australia Peter Lind and Helen Clarke.	64
Water in Australia – assessing Australia’s available water resources and use Ulrike Bende-Michl, Rudi van des Bos and Malcolm Watson.	78
Working with the community to protect the Powlett River Estuary, Kilcunda, Victoria Matt Houry, Dan Garlick and Eleisha Keogh.	86
Interpreting private landholder stream restoration practices Dean Platt.	93
Data versus Desktop: An assessment of the severity of cold water pollution in the Swampy Plains and Murray Rivers below Khancoban Dam Elizabeth Pope.	102

Saving Little Creek	
Alan Hoban, Geoff Vietz, Chris Walsh, Tim Fletcher, Carl Tippler, Georg Eberl and Stephanie Brown	103
A cost effective method for targeting gully rehabilitation effort in high priority GBR sub-catchments	
Andrew Brooks, J. Spencer and G. Curwen	106
Relating with rivers: Geomorphic foundations for ethical cross-cultural dialogue in river management	
Simon Mould, Kirstie Fryirs and Richie Howitt.	114
Habitat mapping as a tool for benchmarking and enhancing aquatic habitat condition	
Rodney Price.	123
Eco-servicing South Creek Catchment: A case study from Australia’s largest urban growth precincts	
Carl Tippler, Michael Dean, Phillip Birtles, P. Davies, Nakia Belmer and Stephanie Kermode.	124
Flood Eye – Improving community access to flood information in North-Central Victoria	
Jolene Goulton, Peter McRostie, Luong Tran and Camille White.	134
The Aboriginal Riverkeeper Team Project – Building Indigenous knowledge and skills to improve urban waterways in Sydney’s Georges River catchment	
Vanessa Cavanagh	141
Upper Owens River low flow planning: Increasing understanding of aquatic habitat under extreme low flows with the use of an interactive river depth map	
Catherine McInerney, Joshua Hale, Owen Martin, Stephen Impey and Andrew Sharpe.	149
Nerang River Estuary Study – Options for managing stormwater and re-instating ecosystem services	
Damian McCann, Mark Bayley and Grant Perriott.	156
Challenges to scaling up site-based data for assessing environmental water outcomes in floodplain wetlands	
Wing Tsoi, Darren Ryder, Paul Frazier and Mark Southwell.	164
Barapa Barapa – cultural connections to waterways	
Sharnie Hamilton, Dixon Patten and Neville Whyman.	172
Habitat Island for Migratory Birds	
Mick Callan and N. Hobden	178
The expanding role of urban fluvial geomorphology: South Creek	
Stephanie Kermode, Phillip Birtles, Geoff Vietz, Stephen Lynch, Jonathon Dixon, Carl Tippler and Michael Dean	183
Wetland Watering, works and measures – in miniature	
Greg Fletcher.	189
Mary River – Understanding processes and values to inform planning and restoration	
Jacqui Reid, Misko Ivezich, Tim Odgers, Denise Lindon and B. Wedlock.	193
Impacts of historical channel changes on the distribution and abundance of Macquarie Perch (<i>Macquaria australasica Cuvier</i>) in Hughes Creek, Victoria	
Wayne Erskine and Mark Turner.	204
Urban waterway restoration: Daylighting Dandenong Creek	
Simon Treadwell, Chris Dwyer and Sarah Watkins.	211

Improving connectivity of unregulated flows across the lower Owens River floodplain – how a landmark study has led to real outcomes	
Julian Skipworth and Julian Martin.	219
Reflections on riparian management and recreational fishers – Scaling up engagement	
Andrew Briggs.	227
A toolbox of sedimentary indicators for assessing the geomorphic structure, function and condition of the endangered Temperate Highland Peat Swamps on Sandstone (THPSS), Blue Mountains, NSW.	
Kirsten Cowley, Kirstie Fryirs and Grant Hose.	231
Engaging industry in good water stewardship – developing a business case	
Michael Spencer.	240
Flow variability and channel forms in southeast Queensland	
Justine Kemp, Jon Olley and Heather Haines.	241
I’m still thirsty: ecological risk assessment for prioritising environmental water delivery.	
Nick Marsh, Amanda Wealands, Amanda Shipp and Minna Tom.	250
Unmanned Aerial Vehicles, applications in stream monitoring and management	
James Rennie.	261
The Murray-Darling Basin Balanced Water Fund and the Environmental Water Trust – using markets and innovative financing to restore wetlands and floodplains in the Murray-Darling Basin for financial, social and environmental outcomes.	
Ben Carr, Deborah Nias, James Fitzsimons and Rich Gilmore.	269
Environmental flows by proxy – a case study from Sarawak, Malaysia	
Michael Bain and Elisa Zavadil.	273
A tender for improving water quality – what’s left to learn from using tenders?	
Shayne Annett, Carl Larsen, Kym Whiteoak, Toby Prosser and Michelle Ezzy.	281
Comparison of stream macroinvertebrate monitoring data from citizen scientists and an aquatic ecologist	
David Reid, Carl Tippler, C Evans and S Kotevska.	292
Building a water stewardship community in Western Port, Australia	
Lance Lloyd.	300
Improving waterway management outcomes through collaborative research: insights from the Melbourne Waterway Research-Practice Partnership	
Rhys Coleman, Rachael Bathgate, Nick Bond, Darren Bos, Tim Fletcher, Belinda Lovell, Peter Morison and Christopher Walsh.	302
A web-based tool for assessing the effects of land and stream management practices on stream condition in the Melbourne region	
Christopher Walsh.	311
Mapping and interpretation of macrophytes within a 200km reach to inform environmental flow management decisions	
James Kaye, Chris Charles, Michael Aberton and Tim Barlow.	315
How is being an asset manager going to make us better waterway managers	
Sharyn RossRakesh, Jean-Michel Benier and David Carew.	319

A collaborative approach to integrating science, management and communities for improving river health in coastal catchments	
Sarah Mika, Darren Ryder, John Schmidt, Adrienne Burns and Ben Vincent.	329
Remote imagery analysis improves condition monitoring and optimisation of management regimes of wetland assets	
Al Danger, Cat Gilbert, Katherine Williams and David Carew.	336
The missing volume: how much sediment did historical gold mining release into Victorian rivers	
Ian Rutherford, Peter Davies, Jodi Turnbull and Susan Lawrence.	342
A multiple lines of evidence approach to assess the ecological condition of urban river catchments	
David Sharley, K Jeppe and V Pettigrove.	351
Using a data-driven approach to understand the interaction between catchment characteristics and water quality responses	
Anna Lintern, Angus Webb, Dongryeol Rhu, S. Liu, Ulrike Bende-Michl, Paul Leahy, Paul Wilson and Andrew Western	356
Instream habitat works trial for Macquarie Perch in the Hughes Creek Victoria, a sand slug stream.	
C Glassford, Joanne Kearns, Kirsten Hogan and Renae Ayres.	364
Finding the balance between sustainable extraction of floodplains and economic enterprise	
Ashley Roberts and Guy Lampert.	373
The Little Stringybark Creek Project: can urban streams be truly restored?	
Christopher Walsh, Tim Fletcher, Darren Bos, Tommy Plahcinski, Sarah Watkins, Rachelle Adamowicz and Marion Urrutiaguer	378
Sorting the wheat from the chaff in the Merricks Creek estuary	379
Ross Hardie and Paul Hodgson.	
Community drive the construction of Engineered Log Jams in South East QLD	390
Nathaniel. Parker, A Brooks and R Bigwood.	
How old is your streambed?	399
Michael Stewardson.	
Urban Streams and disturbance regimes: a hydrogeomorphic approach	400
Geoff Vietz and R Hawley	
Flood frequency and flow scaling in Snowy Mountain Rivers	408
Sander van Tol, Tim Cohen and Ivars Reinfelds.	
Things of stone, wood and running water: Twenty years of River Rehabilitation on NSW North Coast	418
T Broderick.	
Sedimentologically significant tributaries: Characterizing sediment connectivity in the Lockyer Valley, SEQ	435
Peyton Lisenby and Kirstie Fryirs.	
Automatically mapping rivers and vegetation from LiDAR	444
Nathan Quadros.	

Improving environmental water delivery to degraded wetlands Nicola Logan, Simon Treadwell and Sarah Gaskill.	447
Managing grazing on riparian land – decision support tool and guidelines Greg Peters and Peter Vollebergh.	455
Smart rocks and sand slugs: innovative methods for modelling sediment transport in rivers Darren Ryder and Sarah Mika	466
Floodplain fencing – smart planning to ensure flood resilience and long-term ecological outcomes Greg Peters, Peter Vollebergh, Simone Wilkie and James Grove.	473
Responses of riverbank and aquatic vegetation to an instream environmental flow Robyn Watts, Sascha Healy and Nicole McCasker.	483
Evaluating the use of remote sensing to determine changes in willow distribution in the Fish River Catchment Trent Bowman, Kerrie Tomkins and Michael Chang.	494
Drought refuge management: putting some clout into drought Sarah Gaskill and Cheryl Edwards.	498
Assessing riparian vegetation and creek channel condition in a rapidly changing urban space: a case study from Blacktown LGA Michael Dean and Carl Tippler	499
The use and usefulness of geomorphology in river management Kirstie Fryirs.	507
eDNA: the future of aquatic biodiversity monitoring? Josh Griffiths, Andrew Weeks, Reid Tingley and Rhys Coleman.	515
Optimization to support seasonal environmental watering decisions Avril Horne, Simranjit Kaur, Joanna Szemis, Michael Stewardson, Angus Webb and Alysson Costa.	519
Urban Swamp Syndrome: degradation of a high conservation-value swamp from an urban catchment Nakia Belmer, Ian Wright and Carl Tippler.	520
Management and conservation of a unique and diverse Australian river type: Chain-of-ponds Rory Williams and Kirstie Fryirs.	529
Are Victoria’s wetlands changing? The development of a method to systematically monitor the extent, water regime and vegetation characteristics of all mapped wetlands Mark Stacey, Peter Caccetta, Joanne Chia and David Barratt.	538
Decision Support Systems – assisting implementation of long term environmental water planning Bruce Campbell, Ebony Coote, John Foster, Hilary Johnson and Nerida Sloane.	547
Return of the ‘Bottomless Pool’ in Yosemite Creek, North Katoomba, Blue Mountains Geoffrey Smith, Amy St.Lawrence, Christina Day, Eric Mahoney, J. Gooderham and C. Ellis.	562
“Your gorges are awesome”. A method to improve chat up lines, and the articulation of fluvial geomorphic values, based on types of information content James Grove, Ian Rutherford, K. Storey and Justin Stout.	572

Using BioCondition Assessment in the Mary River catchment to evaluate riparian restoration Caitlin Mill and Tanzi Smith.	588
Detecting cease to flow events in streams using time lapse photography Patrick Maiden, Cheryl Edwards and Peter Lind.	599
Assessing the impact of infrastructure and development on streams Simon Andrew, Fiona Coe and Martin Griffin.	604
Bringing Back the Fish to the Horton River: The on-ground works phase Simon Walsh and Andrew Walsh.	612
Testing the feasibility of sediment replenishment from stormwater systems to urban streams Arezou Houshmand,	622
Sediment offsets to fund stream restoration for superior environmental outcomes – case study Port of Brisbane Steve Dudgeon.	623
Concrete and Sandstone – what motivates people to protect and restore Jasmine Payget	629
A Case Study of applying an asset management approach to constructed urban waterways Leigh Smith.	630
Staying afloat with works monitoring and data: A case study from the Murray River Ben Berry and Stephen Wealands	636
RiverMAP River Health Model – using macroinvertebrate data to help understand river health Zuzanna Graszkiwicz, Paula Sardina, Joris Driessen, Lauren Hodgson, Chris Garland and Matthew Johnson	645
Understanding the aspirations and perspectives of Rivercarers in the Mary River Catchment, QLD. Tanzi Smith.	650
Not just a flow problem: how does urbanization impact on the sediment regime of streams Kathryn Russell, Geoff Vietz and Tim Fletcher.	661
Reducing sediment loads to the Great Barrier Reef from the O’Connell River, Mackay Whitsunday Chris Dench and Misko Ivezich.	668
Building investor confidence in waterway management Martijn Gough, Chris Arnott, Paul Reich, Les Tate and Adam Bester.	673
Long-term riparian vegetation monitoring: the Dockers Plains Pastoral Company experience R.James.	677
Are our urban streams on fire? Using studies on fire to learn about the Urban Stream Syndrome Leah Beesley, Neil Pettit, D.C Gwinn and Peter Davies.	683
The geomorphic role of large instream wood in river avulsions Justin Stout, Ian Rutherford and James Grove.	691
Waterway Management Twinning Program – Using Mentoring to motivate, inspire and invest in people Siwan Lovett and Adam Bester.	702

Cost sharing and funding allocation approaches used in Victorian riparian management programs	
Michelle Dickson, Geoff Park, Anna Roberts and David Pannell.	703
Securing funds for waterway investment – boring but important	
Les Tate.	711
Keynote Address – Shaping Water Sensitive Cities – Journey of a River Manager	
Chris Chesterfield.	726
